

### **UCC Endocrinology Interest Group**

Welcome to the UEIG! This interest group was created with the intention of promoting the importance of endocrinology and sharing our love for this field with all students who feel the same way. Endocrinology is a vital part of a doctor's education, as it encompasses the study of hormones that affect all our body systems. Likewise, this field is associated with highly prevalent health conditions in the population, such as diabetes. On behalf of the UCC Endocrinology Interest Group (UEIG), we hope to provide an environment of learning, collaboration, and overall fulfillment.

¡Bienvenidos al UEIG! Se desarrolló este grupo de interés con la intención de fomentar la importancia de la endocrinología y compartir nuestro cariño hacia esta rama con todos aquellos estudiantes que sientan lo mismo. La endocrinología es una parte vital del aprendizaje del doctor, ya que embarca el estudio de las hormonas que afectan todos nuestros sistemas corporales. Del mismo modo, esta rama se asocia con condiciones de salud altamente prevalentes en la población, como la diabetes. En fin, de parte del UCC Endocrinology Interest Group (UEIG), esperamos brindar un ambiente de aprendizaje, de colaboración, y de satisfacción en general.
